THE SKIN BIOREVITALIZATION

JALUPRO® ENHANCER GEL

Eyelashes are a kind of hair with a 3-stage life cycle (anagen, catagen and telogen) similar to head hair but much shorter (1-9 months instead of 3-6 years). Our eyelashes protect the eyes and absorb dirty and irritant substances. They easily weaken as constantly subjected to friction (especially from make-up) and pressure (during make-up removal).

The number of eyelashes decreases and they become thinner, sparse and damaged after 40 years of age.

HOW TO USE

Apply the gel along the lashes (upper and lower) and the eyebrows using the built-in applicator. It is recommended two applications a day (preferably in the morning and the evening) for the first month and once daily application in the next period of maintenance.

The gel can be used as a base before application of coloured mascaras.

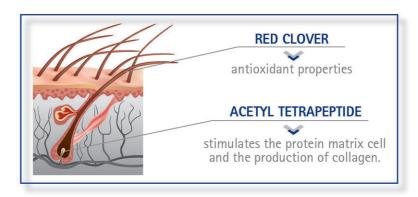

JALUPRO® ENHANCER GEL

Professional Derma has developed an innovative gel formulation to strengthen, lengthen and thicker eyelashes: **Jalupro Enhancer Gel.**

Jalupro Enhancer Gel has been formulated with red clover extract (Trifolium pratense flower extract) and Acetyl tetrapeptide-3 (biomimetic peptide).

The extract of red clover, thanks to its high content of Biochanin A isoflavone, has showed antioxidant properties useful in fighting free radicals, counteracting the damage created by the external environment and stressful conditions.

The molecule **Acetyl tetrapeptide-3** is able to stimulate the protein matrix cell and the production of collagen.

JALUPRO[®]

JALUPRO® ENHANCER GEL

The combined action of the components promotes the vitality and growth of eyelashes and eyebrows and improves the resistance against their loss. Indeed, after 2 months of treatment, along with an increase of resistance, there is a significant growth of existing eyelashes and a re-growth of new ones (+ 45 %).

MOISTURIZING MASK IN BIOCELLULOSE

Innovative thin **bio-cellulose mask** obtained by natural fermentation of coconut water. It adheres to the face like as a second skin and delivers its active components in deep layer. **Jalupro face mask** soothes and hydrates the skin, giving to the face a fresh, radiant and soft appearance after just 20 minutes. Due to Hyaluronic acid, Collagen and Aloe vera, it plays a powerful revitalizing and regenerating action, and at the same time, acts effectively against the signs of skin ageing.
